ABOUT ME

Hi! I am **Frontend** developer.

I have experience in creating **SPA** with **React & Redux**, **TS\JS**, **REST API**.
I immerse into the technologies known to me. And also I study new technology, for example, I want to learn **React Native**, which allows you to create mobile applications with your own interface for **iOS** and **Android**. I am improving my **English** level in my free time.

Open for your suggestions!
